Statement on the Global COVID-19 Situation

The global COVID-19 pandemic has meant that we all have had to make adaptations. In line with guidance on the prevention of the spread of viral infection, we continue to step up our precautionary measures to help keep everyone safe. Together we can make the difference and support our society's protection – both, in terms of global health and the upcoming economic challenges.

HZI and all our sub-contractors are adhering to the official governmental instructions of the respective countries in which we operate to ensure the health and safety of our employees, clients, partners and local communities at all times. This includes daily monitoring, Safe Site Operating Procedures as well as location specific COVID-19 protection plans.

The latter includes measures such as temperature checks for every person entering a site with possible congestion, reduction of density of people working at the same time, strict compliance to social distancing requirements, rigorous hygiene measures and in place enhanced group collaboration and communication. The health and safety requirements of any construction activity are strictly controlled at all times. If an activity cannot be undertaken safely it will not take place.

Despite difficult circumstances, HZI is doing everything possible to ensure the health and safety of our people and local communities while continuing operations. We are working with our internal teams, supply chain and clients to assess and make sure we have adequate procedures in place to maintain service and delivery. We are meeting daily to review and refresh our approach as the situation develops. Colleagues, clients and partners worldwide can reach us through the usual channels.

We wish you all the best, stay healthy and take care of yourself and your close ones.

Yours sincerely
Hitachi Zosen Inova AG
